New High-Performance C-size Flatbed Color Copy Scanner

The Other Solutions unveils the ScanPlus 6 ATF1824B for Graphic Arts, Copy Shops and Photo Labs!

Meridian, Idaho – April 1, 2007– *The Other Solutions* is announcing that it will distribute the new GTCO Calcomp C-size color flatbed scanner, the ScanPlus 6 ATF1824B Copy Scanner. The ATF1824B is the second-generation color flatbed scanner from GTCO Calcomp with improved lenses and fast digital processing delivers high scanning speed and uncompromised image quality, easily surpassing other flatbed scanners on

the market.

Meeting the needs of reprographic houses, quick print, photo labs and graphic arts, the ScanPlus 6 ATF 1824B has proven its versatility in all major market segments, even finding a new niche in the textile industry for scanning fabric, clearly demonstrates versatility and quality.

With both USB2 and LAN interfaces, it can adapt to different environments as a stand-alone copy system, a true network scanner or as a traditional scanner attached to a local PC via the USB2 interface.

The new ScanPlus 6 ATF1824B has added an internal hard disk that increases the LAN performance considerably. No longer will network printing or network scanning slow this scanner down! The ATF1824B scans the image directly to the built-in hard disk and then as network bandwidth permits it spool the scanned image to the network. This new feature allows scanning at full speed for maximum scanning productivity. The new ScanPlus 6 ATF1824B is priced at \$11,900 and works right out of the box by simply connecting it to the network. This scanner can easily be justified with scanning and copy requirements of about 200 drawings.

GTCO Calcomp's wide-format scanners are based on the latest scanning technologies, yet they are affordable to meet every customer's needs.

"The new ScanPlus 6 ATF1824B copy scanner retains its technological advantages in the market, yet adds new innovations as a true LAN scanner with internal hard disk for maximum productivity and further reduces an end user's Total Cost of Ownership. This welcome benefit for our customers translates directly to an improvement to their financial bottom line. The new scanners come standard with a two-year on-site warranty within the US. The GTCO Calcomp wide-format scanners are available through us," states Henrik Vestermark, President of *The Other Solutions*.

About The Other Solutions:

The Other Solutions is an established Internet distribution company. The Other Solutions specializes in finding and deploying new, unique and often difficult to find business solutions for customers throughout North America. Our corporate philosophy of "Thinking Outside the Box" differentiates us from other Internet distribution channels because our goal is to provide affordable, high-quality products and services to our customers through a "user friendly" online store. Our mission is to deliver the best products—fast, securely and affordably. The Other Solutions distributes products from all over the world through its headquarter in Meridian, Idaho.
