## User-friendly NEXTime Software Enhances Productivity, Scanning Experience, and Image Results

NEXTime, a new generation multi-function software solution, signals the end of fine-tuning and re-scanning for imaging professionals using wide-format scanners.

Meridian, Idaho – June 17, 2008 – The Other Solutions is proud to announce the availability of NEXTime, a new generation multi-function software scanner solution that signals the end of fine-tuning and re-scanning for imaging professionals. This powerful software for wide-format scanners makes scanning tasks faster with an intuitive user interface and advanced imaging features. It also intelligently corrects every scan for contrast, balance, and detail – which reduces re-scanning and increases user productivity. Providing true multi-function capability, the new software features integrated scanning, copying, and editing utilities.

*"If hardware is the heart of wide-format scanning, software is definitely the mind,"* says Karin Smitt, VP, Sales and Marketing for The Other Solutions operations. *"For professionals who work with wide-format documents, easy-to-understand software is essential to productivity. They also don't have the time to re-scan or endlessly tweak settings to get the right contrast, balance, and detail – so our scanners and NEXTime work together to intelligently correct every scan to get the best image possible."*

Combined with GTCO Calcomp S Series and HD Series scanners, NEXTime software makes advanced image editing simple – even for new users. With features like built-in color management, B/W adaptive thresholding for monochrome cleanup, and advanced color matching with closed-loop or ICC color copying, NEXTime helps produce copies that are often even cleaner and clearer than the originals.

The software also features time-saving functions like workflow presets for individual scanning jobs, automatic file naming, and multi-frame file clipping. As Smitt explains, *"NEXTime optimizes the time spent at the scanners. The built-in application printer drivers also make it easier than ever to network with a wide variety of office printers, which is a big advantage in today's office environment."*

NEXTime Software at a Glance:

- \* Plug'n'Play connectivity with nearly all wide-format printers
- \* Integrated scanning, copying, and filing – all in one user-friendly interface
- \* Fast pre-scans with instant preview
- \* New Detail View feature with real-time image correction
- \* Edge-preserving smooth filter prevents hard lines and borders
- \* Color-preserving black and white enhancement improves contrast, leaving colors intact
- \* Industry standard ICC color management or closed loop color calibration

The new NEXTime Scan sells at \$700 and the NEXTime Scan and Copy software for \$1,500.

#### About The Other Solutions:

The Other Solutions is an established Internet distribution company. The Other Solutions specializes in finding and deploying new, unique, and often difficult-to-find business solutions for customers throughout North America. Our corporate philosophy of "Thinking Outside the Box" differentiates us from other Internet distribution channels because our goal is to provide affordable, high-quality products and services to our customers through a "user friendly" online store. Our mission is to deliver the best products—fast, securely, and affordably. The Other Solutions distributes products from all over the world through its headquarters in Meridian, Idaho. For more information about *The Other Solutions*, its line of products, and online store, please visit us at [www.TheOtherSolutions.com](http://www.TheOtherSolutions.com). Or call +1 (208) 887 4780
